

A Depth of Opportunities

Dumas is one of Canada's most successful underground mining contractors specializing in technically challenging mining projects in mine construction, mine development, shaft sinking operations, raising, and engineering.

Mining Engineering & Contracting Opportunities

Dumas Contracting Ltd. has experienced unprecedented growth in all aspects of our business, both domestically and internationally. We are an innovative organization that highly values its people and employee relationships. Our commitment to safety and client relationships are the cornerstones to our business.

The Business Development and Technical Services groups are currently seeking motivated individuals with demonstrated experience and abilities in underground mine engineering and construction projects and specifically in the following areas:

- **Mechanical Engineering and plant maintenance**
- **Mine engineering feasibility studies**
- **Cost estimating and scheduling**
- **Project management and project controls**

The successful candidate will have a combination of mine operating or contracting experience complemented by a technical degree from a recognized college or university and relevant industry experience. Excellent organizational and communication skills are required and the ability to conduct business in French and/or Spanish is a valued talent. Strong capability in a variety of computer software applications is essential.

A number of key positions are available now, including but not limited to:

Senior Mechanical Engineer/Superintendents

Playing a key role in providing mechanical design and engineering support in the organization, you will direct, manage and lead mechanical installations in support of mine project construction. You will be responsible for engineering drawings, contribute to tendering work and estimating, and provide engineering services for shaft designs, pumping systems, hoisting systems, conveyor systems and mine ventilation systems, and technical solutions to Dumas' contracting business in order to meet client needs.

Operational experience including administration of preventative maintenance programs for mine hoists and hoisting systems is required. Experience working closely with sub-contractors and clients is valued and the ability to work within different jurisdictions ensuring compliance with relevant codes and regulations is essential to success in the role.

Mining Engineers/Estimators

These opportunities will appeal to both Senior (Lead) Engineers/Estimators as well as individuals with the desire and ability to learn how to prepare cost estimates and project schedules and manage the construction of world class projects. Positions are available at all Canadian offices to support a growing order book and list of clients. You will be responsible for developing detailed multi-disciplinary capital cost estimates including conceptual estimates through to definite control estimates and schedules for both engineering and tendered contracts for underground mining projects.

Our compensation packages are very competitive and rewarding. To discover more about our company and our services, visit us at www.dumasmining.com.

In order to join a dynamic organization, send your resume by March 19th to the Human Resources Department, at: fax: **705-360-1853** email: hr4@dumasmining.com

We thank all applicants for their interest; however, only those selected for an interview will be contacted.
